

Kensington Avenue Primary School

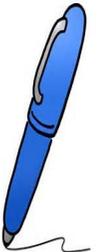

How have the Mayans influenced our lives today?

Dear Parents/ Carers and Year 6 Children,
Our next topic is going to be all about The Mayans . In preparation for this please re- search and complete a project on this ancient civilization. This could be a poster, a power point, an information booklet etc. Try to be creative! We look forward to seeing and sharing them on the first day back after the holidays!
Enjoy your holiday
The Year 6 Team

As readers we will be empathising with the main character, using our inference and deduction skills and developing our ability to identify how a character is feeling in the story. As classes we will also be practising retrieval skills and comprehension skills related to the text that we are reading. As part of our SAT preparation we will be developing reading stamina .

As authors we will be using the amazing story "Way Home". Whilst reading this text we will be completing a re- count, diary entry, poem and an extended narrative.

As scientists we will be studying circuits. Our focus will be building circuits to vary brightness of bulbs, volume of buzzers and accurately recording them using circuit diagrams and component symbols.

As historians we will be investigating the ancient civilization of the Mayans. We will be investigating what life would have been like for them and how they have affected our lives today.

As citizens we will be looking at how different people in different countries and cultures live their lives. We will be linking this to our main text "Way Home" this half term. As a year group we will be focusing on people that are less fortunate than ourselves.

As athletes we will continue to develop our team skills and sportsmanship with the Sports Coach.

As mathematicians we will be continuing to focus on multiplication tables and related division facts. During the next half term as a year group, will be continuing to complete weekly skills tests, the results of which we are sure your children will tell you! The main topics will be fractions, decimals and percentages, data handling, time, division methods and solving SAT style word problems.

As ICT technicians we will be learning how to code in Python Programming.
